Fresh graduate in Informatics Engineering from Jenderal Achmad Yani University with hands-on experience in AI solution development, LLM integration, and full-stack systems. Experienced in building AI-powered workflows, automated reporting systems, and data processing pipelines using Python, FastAPI, OpenAI APIs, and modern AI technologies through internships at Nolimit Teknologi Indonesia and Telkom Indonesia, as well as an international IEEE publication. Passionate about building AI-powered products that transform complex data into actionable insights.

EDUCATION LEVEL

Bachelor Degree in Informatics Engineering, Jenderal Achmad Yani University

Sep 2021 – Feb 2025

- GPA: 3.82/4.00

PROFESSIONAL & LEADERSHIP EXPERIENCE

Data Scientist Intern

Nov 2025 – Mei 2026

Nolimit Teknologi Indonesia • Internship

- Developed and deployed automated NER & Whostation inference pipelines, processing 50K–1M+ social and online media records through REST APIs and Kafka-based messaging, eliminating manual inference workflows and supporting production monitoring systems.
- Fine-tuned ModernBERT and IndoBERT models for text classification on 9K+ labeled samples, generated data using OpenAI LLM, and developed automated training and inference pipelines.
- Contributed to the development of a full-stack media monitoring PoC using Next.js, TypeScript, FastAPI, and Python, processing 12K+ social and online media records and generating 900+ discussion topics through automated topic generation pipelines.
- Built a batch-processing enrichment system and monitoring dashboard for emotion and sentiment inference, automating processing across datasets ranging from thousands to over 1M records while leveraging PostgreSQL for data storage and pipeline management.
- Developed an agentic reporting system leveraging Elasticsearch, BERTopic, and prompt-engineered OpenAI workflows to automatically generate 9–10 key issues per report, reducing report preparation time from hours to minutes.

Data Scientist Intern

Oct 2024 – Mar 2025

PT Telkom Indonesia • Internship

- Extracted, transformed, and cleaned data using SQL and Python to support business intelligence reporting and business performance analysis.
- Built dynamic dashboards for both sales teams and internal stakeholders, streamlining product performance tracking and enhancing strategic decision-making.
- Assisted in developing forecasting models using Python to support business prediction and trend analysis.

Data Scientist Intern

August 2024

PT Telkom Indonesia • Internship / Practical Work

- Developed an automated video-to-text extraction pipeline using OpenAI Whisper models, converting educational video content into structured text to support downstream NLP and analytics workflows.

PROJECTS & PUBLICATIONS

Parallel Hybrid 2D Convolutional Neural Networks and Recurrent Neural Networks in EEG Post-Stroke Identification Based on EEG Signal

2024 11th International Conference on Electrical Engineering, Computer Science and Informatics (EECSI) · 12 Dec 2024

- Conducted research in signal processing in collaboration with a lecturer, resulting in a published paper in IEEE.
- Presented research findings at the EECSI International Conference on Nov 26 – 27, 2024.

LANTAS-VISION (Group Project MSIB – Orbit Kampus: AI 4 Jobs)

Orbit Future Academy · 2024

- Developed a computer vision model for real-time traffic analysis using YOLOv8.

ACHIEVEMENTS AND CERTIFICATIONS

- Orbit Kampus: AI 4 Jobs** – MSIB Kampus Merdeka (2024)
- Team Member – Awarded Research Grant for PKM-RE Program** (Funded by the Directorate of Learning and Student Affairs, Ministry of Education, Culture, Research, and Technology, 2023)

SKILLS

- Programming Languages: Python, SQL
- AI & Machine Learning: NLP (NER, Sentiment Analysis, Text Classification), Prompt Engineering, LLM Integration (OpenAI API), BERTopic, Deep Learning (CNN, RNN), Computer Vision
- Full-Stack & APIs: FastAPI, REST API Development, Node.js, Next.js, React, Tailwind CSS
- Databases, Infrastructure & Tools: PostgreSQL, SQLite, Elasticsearch, Apache Kafka, GitHub, Streamlit, Tableau
